TRIP OVERVIEW:

Take the road less traveled and experience the real Morocco off of the beaten tourist circuit and into a land of remote Berber villages, nomads, ancient architecture, exotic cuisine and unparalleled hiking. Your guide, Cloe Medina Erickson, has been traveling and working in Morocco for a decade. Cloe speaks Arabic and through her contacts you will experience the countryside as the locals do - by foot and donkey, stay in Berber guesthouses, visit sustainable cooperatives and the Igherm Restoration and Library Project, and hike in the Atlas Mountains. In addition, you will spend a few days in the magical city of Marrakesh where you will stay in a traditional garden house (*riad*) in the old city (*medina*) and explore its ancient markets and architecture. Come with Bella Treks to Morocco and immerse yourself in a tactile adventure, where you will be a part of and feel the beat of the country and its people.

Cultural Awareness

Clothing

Out of cultural respect men should not show their shoulders and knees and women should not show their elbows and knees. This means NO shorts. Capris or long pants/skirts only. No tank tops for men and no short sleeve shirts for women (3/4 length or long sleeve only). Nothing tight fitting for women; please do not expose your feminine figure. All clothes should be light weight because it will be warm. Button up shirts are better than t-shirts. Also remember that everything you bring will be used and abused, so don't bring your most favorite and expensive items. You will see other foreigners wearing less culturally aware clothing both in Marrakech and the mountains. However, they are 'tourists' rather than guests of the locals. Please be conscious of this while packing.

Health & Safety

Morocco welcomes many visitors with a good case of intestinal problems. This is not because the bacteria is bad, it is just different than what our bodies are used to. I travel with acidophilus and grapefruit seed extract, both found at the health food store. These are great ways to combat bacteria on a natural level. If it worsens we have antibiotics to administer.

Zawiya Ahansal is a day's travel from the nearest medical facility. There are NO doctors in the region. This is important to keep in mind while recreating in the area. Be careful at all times; do not take extreme risks to your physical health and safety. Compare the remoteness to being on a backpacking trip in the wilderness; help is hours away. We will have a phone for emergency contact. Please visit the Center for Disease Control for suggested vaccinations and current health advisories. <http://wwwnc.cdc.gov/travel/destinations/morocco.aspx>

Suggested Vaccinations for Morocco

- Tetanus, Diphtheria, Pertussis (Td/Tdap)
- Measles, Mumps, Rubella (MMR)
- Hepatitis A (may require more than one dose - allow time prior to travel)
- Hepatitis B (may require more than one dose - allow time prior to travel)
- Typhoid

You do not need Malaria, Yellow Fever or Cholera.

Food and Water

Don't drink that water! Water purification of some kind is necessary. Bottled water or treated water will be available to you at all times. The houses where you will be staying in the mountains serve breakfast, lunch and dinner. However the food lacks in protein and variety so bringing your favorite protein bar or jerky from home is recommended (remember this adds weight to your luggage).

Alcohol and drugs

Alcohol is forbidden in Islam and Morocco is a Muslim monarchy. In addition, drinking alcohol in front of locals and their families is considered disgraceful. Out of respect for the locals that we will be traveling with our trip is an alcohol free trip (wine will be available at dinner in Marrakesh). In addition, Morocco may be famous for its marijuana and hash but it is still illegal. It is also considered extremely disrespectful to do this in front of locals.

Language

Arabic is the official language of Morocco. French is widespread in metropolitan areas and with men and teenagers in rural regions. Berber is the language of the mountains. English is very rare, with the exception of Marrakesh where it is more and more apparent, but still not everywhere. A little Arabic goes a long way; an Arabic phrasebook is priceless.

Money

Morocco's official currency is the dirham. ATM machines and money exchange houses are plentiful in Marrakesh. However, credit cards are rarely accepted, even at prominent tourist hotels and markets. Do not count on these services outside of the city. If you plan to shop, exchange money or withdraw it before leaving Marrakesh. VISA is the recommended credit card for an emergency.
